ZECO was founded in 1991 with the focus on manufacturing Water valves, including control valves, balancing valves, gate valves, butterfly valves, check valves, and air valves .etc

In 2008, With the support of the Jiangsu Binhai local government, We set the valve production base and R&D center in Binhai pump and valve industrial park through nearly a year's hard construction. in the following year, ZECO valve group was formally established. Today, We have a modern workshop, more equipped with hundreds of sets of modern equipment, has a professional design team and management team, and hundreds of outstanding employees with strong professional dedication, the group has been promoted to a new level in design, production, and manufacturing of valves.
